*Future Begins Here*

A Venture to find perfect solution to enhance the career and a unique mind adoption program

## PREFACE

This venture is specially designed to raise the human abilities, capacities and to hold the plummeting career. All the human beings are not grown up with equal abilities due to their genetics and environment at home and place where they learn. Some are good in calculations while others are excellent in sports. But the good thing is this that we can improve our qualities by the time and can enhance our abilities, hidden talents, awareness, concentration of mind, intrinsic motivation, the caliber, value of time management, health and diet, effective communication, grooming, confidence and curiosity.

All this involves a special programme to be inculcate in the education system. To achieve the target, we have to start from the beginning. What we observe through our senses like Sight (VISION), Hearing (AUDITION), Taste (GUSTATION), Smell (OLFACTION), and Touch (SOMATOSENTATION) enables us to identify and to know about the surroundings. The process is followed by analysis and observation. The observation is the result of the brain analysis. Human brain works differently to observe universe and surroundings. Despite anatomically we all have same brain; still the results of observations vary from person to person. Observation and awareness is the key to learn so there must be some factors that make the observation different. The broad factor for this difference can be an experience and the continuous observation throughout the life. The above findings show that to be perfect and to learn one depends on observations and experiences. This is called learning through observations. This process of learning through observation is a cumbersome task. In the ancient time most of the learners were dependent on this method. In those times, there was a tradition of learning through Gurus. The learner who was appointed under a Guru is called Shishya. The process of acquiring knowledge by Shishya from Guru was excelling. Those gurus develop knowledge and perfection in Shishyas through the continuous observations and practices. Along with the minute observations, Guru used to concentrate on the mind of the Shishyas. This practice generates the hidden power of brain and mind. The guru or the teacher had enough intellectuality to provide a good knowledge to their students. We can find many examples of this unique learning process from the past history and ancient literature. This process was only executed in royal families or the few chosen randomly by a guru. Other people were deprived from this act of transferring knowledge. But with the passage of time the scenario has changed.

Nowadays as the education system experienced continuous changes and expanded at a rapid rate, the intellectuals are chosen on the basis of their specialization and domain in education system. The educational institutes are open to all by paying a fee. The fee is used to pay the salaries to staff and teachers and also manage various expenses of the organization. The race of getting more scholars admits in these institutes by luring them with modern infrastructure

and facilities these institutes have become a place of business and hence become materialistic. The competition of getting more students results in more commercialization and increase the cost of maintaining these institutes. This also results in greed to earn more from educational sector by some management. Neither this process of commercialization in educational system can be hindered or latered nor can be changed in this competitive world. The outcome of this commercialization has certain draw backs and weakness which is making real education system weak. The system requires some s to make necessary changes to make efficient and effective education system without any flaws. Effectiveness is the only possible if we change our vision and understand how to pair the ancient methods with new methods using new techniques and tools. A perfect blend of these two can really improve the system and a new era of learning can start.

It is a matter of fact that in today's scenario we have made our education system full of stress and burden which has adverse effect on the tender minds of the learners. Also the current education system badly ruins the natural curiosity of the students. In this process and self made competition, most of the students lost their individual identity and start living in illusions. The biggest misconception in these students after completion of studies is to get a good employment. But at the end, huge competition in the market ruins their dream. They become a demoralized person and lose their confidence level. The things become worse when we put stress on the students to score more marks to be successful. But we never guide them to have a content based education and cognitive learning. In this way, we leave them in stress and burden. Same happens with the professionals. Majority of them are not satisfied with their current careers. Moreover, they are in continuous stress of being in current profession which is not chosen wisely. They always remain in a endless search to opt for another one. The problem is not in the profession but it lies in the system in which they learn and this results in poor mind set which is surrounded by the self created boundaries. They are unable to cross the barriers of negative thinking in their minds. These type of persons are unable to contribute to the society and helps in nation building. These types of poor minded people always strive some shortcuts or illegal ways to attain goals and success. Some of them await for the miracle to happen while some of them may compromise with themselves and cannot do anything productive in life.

Another imperative thing to be discussed here is that there are seven types of intelligence so far. Every person is blessed with one. But unfortunately many of them are not able to recognize it properly unless some experts make them aware of. A proper guidance can make someone to develop all the seven intelligence. We help to generate these senses with unique methods and strategies applied during adoption of mind with activation the hidden power of mind and brain. This is called extreme achievement and is rare one. It is possible only by proper guidance of the experts and professionals. But when the learner takes and start the programme

under guidance and supervision of experts, mind start generating extra power to think and learn very easily and effectively. When effective learning and capabilities start developing, it generates cognitive ability to learn, means that if we adopt the mind at the right time that makes a lot of difference. Not only we help the student to make deep focus and strong goals but we also make the student stress free and make him capable to achieve his goals. We make the student to understand the priorities. We never let them feel pressured during the unique programme, to do all achievements at once, but to learn in small steps and portions. This will surely make student stress free and thus able them to make more concentration on desired things.

Our team with the experience of more than a decade in education sector has completed the surveys and analysis of 678 students very minutely in the past two years. In this mission; meritorious, mediocre and failure students were interviewed for their achievements. The grievances of students related to studies, their environment at education institutes, homes and their financial background were observed. The conclusion of the survey shows the failure of the education system to fulfil its mission. So, we decided and pledge to develop a venture, a system that can be induced in education sector to generate a wave of awareness and identification of the skills hidden in the minds of the youth. We people being an educationist decided and made a professional team to help the society, including students, professionals, entrepreneurs and employees of different sectors. In this process, our main focus will be on students because they are the future of our nation but others too can also have a benefit from us by knowing the art of better living and how to lead contented life full of human values. We have designed certain processes through which everyone can have benefits by just taking own initiative and a programme for every one under our guidance. We have to leave all the controversies and our personal motives in the interest of the future of the students, professionals, society and nation. We do hope from the heads, principals, directors and owners of the educational institutes to come forward and join hands with us to shape the better, safe and secure future of students, hence a strong nation.

**“Let us join hands here to concentrate on vision and mission all together and form a wave”.**

## **VISION**

Career Escorts tends to be renowned world level leader in the integration of:

1. Dynamic mind Adoption System termed as (EEE).
2. Advance Life Skill Knowledge through Research and Observation.
3. Effective and fool proof Student Support System (SSS)

Further this Venture helps students to be successful professionals who are able to have good Leadership Skills, Exemplary Educational Skills and related services to improve the lifestyle of themselves in this changing and complex global society. We have firm believe that there is lot of hidden talent in the students. This can be explored and make the student capable to make best of its utilization till end. Further, it will be the responsibility of our teams and venture to come forward and enrich the caliber and thinking of the learners so that one can be able to adapt with the changing trends with easiness. This is the great example of mind development that our ancient sculpture, Vedas, holy literature had things related to cosmology and modern scientific concepts. Some of them are proven and we except the facts. Lot more, is there which is still to be explored by researchers and scientist. Even it's a matter of great astonishment that at those times, without any equipment like communication, satellite, rockets, computers, transportation, how intellectuals develop and explores universe and the hidden facts. The answer behind this is simple that they have developed the hidden power of mind and body. After all it is the game of mind set, and we are so professional that we make the mind sharp to play and take away any game

We also have a vision to expand in North India in first phase and then to the other parts of India in second phase. We will also expand in European countries soon. All this can be possible with the help of Educationist and people behind education system.

## **MISSION**

Mission of the Career Escorts is to deepen and extend knowledge about the formation and best utilization of human capabilities, to explore inner strength and abilities, utilizing the full power of brain, foster the life of spirit, cultivate life having leanings. It is the integral part of our mission to extend services to rural areas of India and targets specially those students studying in Government schools. We will try our level best to make the poor section of society, to be benefitted by our unique programmes. All the humans who join this unique programme may be from any part of the society, state, country of the world. They will surely get the new perfections to enhance and to create new horizons in their life and lifestyle. We make them able to learn art of living, how to make dreams come true and real punch of humanity and human values. We will provide a platform to all students, entrepreneurs, and aspirants where all the challenges of life and career seem to be dwarf. We will make all the students and others to utilize the hidden power of human brain through our training and adoption system of mind. A new vision will be there to see the life.

One integral part of our mission that if somebody wishes to go overseas we will impart them full awareness about how to go, when to go, where to go. We wish that instead of adopting illegal ways and shortcuts to settle abroad, we will opt for you the right procedures and legal ways. Let you assure that we will never do immigration for anybody; instead we will guide and assist you out to achieve your mission.

## **BELIEF**

1. A literate and educated citizenry is a vital to the democratic society.
2. All students are entitled to a high quality education system, grounded in sensitivity to individual dignity, professional education and nurturing environment.
3. Technology to be used as a tool for quality learning, research, building better nation.
4. A catalytic technique used to make best use of hidden power of human mind and brain.
5. Students learning abilities of each student are not same, we help them to be on single platform to learn and grow equally.
6. If a chance is given to the students to follow these programmes, the picture will be entirely different in the terms of growth of mind and soul.
7. A properly educated and contented human always trust in a team work and always try to grow together with others.
8. A healthy body has a healthy mind; we need both to be tuned. To ensure good health diet plays crucial role.
9. To enrich the society in the terms of success, contentedness will help to build better nation.

## **GOALS**

1. A Continuous Research and Observations has done by our team to create this system which will help the students to enhance the learning capabilities and abilities.
2. To make all the adopted students to trigger and to follow methods to make utilization of inner-strength of mind.
3. Inducing HEUTAGOGY which helps the student to self determined learning, sustaining the quality of information required to uplift the caliber of the students.
4. Using KINESTHETIC LEARNING which helps the student to learn through physical activities thus enhance the efficient and effective management system of the organization to provide maximum benefits to the students.
5. To cover remote, backward and rural areas so that students can be benefitted to the large extent.
6. To decrease the gap between job providers and job seekers.
7. To change the mind set of society, so as to start a new era of attaining success, to build nation to follow by others.
8. We wish to make this programme to a wave instead, so that each and every person may join us willingly without any kind of hesitation.
9. This venture will be an open programme for every human and enriched with human values.

## **IDEOLOGY OF THE SYSTEM**

To understand completely about the ideology first of all we will have to know that the human mind consist of two portions, one is conscious mind (10 %) and the other one is sub conscious

mind(90 %). Normally many of us use conscious mind to learn, to make decision, to do day to day work and all other routine works. Except few, all are unaware about the sub conscious mind and they are unable to use its power throughout their life. Our IDEOLOGY is that we adopt mind of the student or a person to make them aware about the hidden power of the sub conscious mind. . But it is a good thing that through proper guidance and awareness we can make it active slowly with a practice. We may be able to develop extra ordinary power of sub conscious mind to perform in life. we will work on fifteen traits for them as designed by us in a fixed duration of time that varies from three months to twelve months. We will neither interfere in academics of the student nor interfere in the environment of the education place. In fact, we will make them total stress free by adopting their *mind*. Our ideology is based on the term KINESTHETIC that is learning by practical work and enrich the minds by the achievements gained by student during practical session.

By adoption and proper guidance one can attain tremendous power of sub conscious mind which is also called Mid Brain activation. This activation of the hidden power is too simple that only you have to do is to join us and let all leave to us. This will change you and your life, provide you new horizons to think, a new vision to take your life, a new spirit to be an excellent performer, learning will be so easy and effortless, you will get perfect routine, you will gain a new dynamic personality and of course a true human.

We will also help you to get content based education instead of percentage based. If a person goes for content based learning, percentage will automatically follow. We will also facilitate all for the information regarding competition dates, the method of preparation and how to crack them.

Remote living population is totally unaware about the quantum and utilization of the education for livelihood. They only dream to have basic qualification and wait for the miracle to happen. We wish to guide them properly so that they can change the way of their conservative thinking.

One last but not least, the best future can be explored in the native place, but if someone wish to go abroad for studies and career, we will help out those in a right and legal way. We will never act like immigration consultant nor do we indulge in such kind of activities. We wish that if someone goes abroad, must be through legal and right way.

## **HOW THIS SYSTEM WORKS AND FOR WHOM**

We have designed this system for the students from Nursery to Ph.D. levels. Grownups can also come to us for better living as they may also have benefits from this unique programme. The

fifteen traits can create a miracle and make all the humans to lead a stress free living and to achieve the required goals of their lives. We help all to cope with the changing global trends and environment. One has to change the mind set by utilizing the hidden power of human brain. We termed this programme “EEE” means

“ENTRY LEVEL”

“EXECUTION LEVEL”

“EXIT LEVEL”

Every person has a little amount of seven intelligences in them and one of this intelligence is special. This varies from person to person and decides to what kind of intelligence he has and that will decide the character and his personality. But unfortunately this thing is not known to humans except few. If we make practice in the supervision of professionals, we may enhance these intelligences. We developed a Student Support System “SSS” , specially for students in which we will make database of those who opted our programmes and help them to know the latest trends in education, important tests and their dates, to select a career line better for them, to prepare competition and techniques to crack them, to go abroad and settle there.

1. **Motivation:** To boost morale and thus to see and set new horizons of life
2. **Mind Development and Concentration:** Provide you a new platform to perform and stability of mind helps you to be stress free thus a happy life forever.
3. **Mantel Ability:** Enable you to solve all problems easily may be competition or life.
4. **Caliber Building:** Help you to develop leadership qualities and team work.
5. **Communication and Grooming:** For better presentations of yourself and topics and charming personality.
6. **Diet and Health:** A healthy and disease free life full of stamina.
7. **Decision Making Ability:** Ability to opt for the best and to avoid double mindedness.
8. **Time Management:** To perform well in time and to avoid delays.
9. **Learning Ability:** To get cognitive learning and to set new aims and goals.
10. **Art of Living and Social Manners:** To live better and to savour the nectar of life and a respect in society.
11. **Aura Generation:** To build electromagnetic power of your body more powerful and for mind mapping.
12. **Presence of Mind:** To be at first place and to be more responsive to the surroundings for good observations.
13. **Psychological Assistance:** Help you to explore the inner strength and performance at the best.

**14. Psychiatric Assistance:** Help you to remove boundaries of your mind and to think beyond circumstances.

**15. Analytical Power Development:** Help you to choose best for you.

To enter this unique programme, one has to go through a performance which will cover the psychometric performances, all abilities performances, caliber and vision performance, analytical performance, after which analysis report will be published individually and this report will ensure the quantum of need for fifteen traits. Then execution of the programme will take place. This enables all to be a part of our database for further information and programme.

We welcome those institutions/ schools/ colleges/ organizations who understand the ideology and the mission behind this venture. We extend our hands to get the mutual understanding between you and “CAREER ESCORTS” to induce the programme in your organization. We will never ever interfere/ change/ defame/ in any kind of the policies, programmes, strategies opted by you, nor your admissions/ employments, as we do understand the matter deeply. This will surely help you to change the overall performances of the scholars/ professionals/ teachers and all. It will start a new era of cognitive learning. An Endeavour will be there to highbrows the career. We will generate the placement opportunities for you. This will generate the success rate to shoot up and help to increase TRP of the institute.

Rest a lot and more is there which cannot be mentioned here but can be executed practically. If you have any query or doubt or misunderstandings to the related issue feel free to contact personally or telephonically, we will be pleased to make you more informative.

### **SALIENT FEATURES OF THE VENTURE**

1. A complete knowledge and implementation of life sciences and skills.
2. Special help for deserving and poor section of the society.
3. Stress free learning and life style.
4. State-of-the-art techniques.
